CHEMICAL MANAGEMENT ESTIMATE SHEET

US Peroxide (USP) provides turn-key chemical management and field service programs to engineering companies and remediation technology applicators using In-Situ Chemical Oxidation (ISCO) or other technologies requiring chemical storage and handling. USP programs have proven to be cost effective and highly efficient using custom-designed chemical handling and management programs deployed by highly-skilled field service teams.

For project-specific chemical pricing, provide the information below and fax or email to Dan Kile, TCM and Remediation Business Manager.

Tell us about you...

Contact Name: _____	Email: _____
Company Name: _____	Phone: _____
Address: _____	Cell: _____
City: _____	State: _____ Zip: _____
Your Role in Project : Property Owner <input type="checkbox"/> Consultant <input type="checkbox"/> Remediation <input type="checkbox"/>	

Tell us about the project...

Project Name: _____	Facility Type: Commercial <input type="checkbox"/> Industrial <input type="checkbox"/>
Delivery Address: _____	Government <input type="checkbox"/> Residential <input type="checkbox"/>
_____	Facility Status: Active <input type="checkbox"/> Vacant <input type="checkbox"/>
City: _____	State: _____ Zip: _____
Application Method : Injection Well (in-situ) <input type="checkbox"/> Direct-Push <input type="checkbox"/> Mechanical Mix (ex-situ) <input type="checkbox"/>	
Contaminant Type: VOCs / BTEX <input type="checkbox"/> CVOCs <input type="checkbox"/> Heavy Metals <input type="checkbox"/> Other: _____	

Tell us what and how much chemical you plan to use...

OXIDIZERS	%	Qty	ACIDS	%	Qty
Hydrogen Peroxide		gal	HCl / Nitric Acid / Muriatic		gal
Sodium Persulfate		lbs	Other Acid		
Permanganate (K or Na)		lbs	IRON SALTS		Qty
Sodium Percarbonate		lbs	Ferrous Sulfate		gal/lb
Other Oxidizer			Ferrous Sulfate EDTA		gal/lb
BIOAUGMENTATION		Qty	Other Iron Salts		
O - Releasing		lbs	OTHER		
H - Releasing		lbs			
Other Bioaugmentation		lbs/gal
